

# AEITHALES “THE NIGHTMARE”

## Training Course press release

The Educational Organization Sharp Minds implemented on the 7th till the 18th of September in Raches Fthiotidas, the Erasmus+ Training Course called AEITHALES “THE NIGHTMARE” [Erasmus+ code: 2022-1-EL02-KA151-YOU-000067155].

The goal of the project was to raise awareness and discuss on a deeper level modern issues like climate change, energy crisis, alternative energy sources, green energy and many more. Fifty participants from Greece, Croatia, North Macedonia, Türkiye, Bulgaria, Romania, Italy and Czech Republic, all took part in this project.

After giving them all the necessary information, as part of the dissemination plan, each national group is called to create its own campaign and hold its own event back in their home countries. The participants were able to unleash their creativity through workshops where they were called to create their campaign’s banner and topic.

Not only was awareness raised through workshops and simulations prepared, but also through action. The entire group contributed into clearing the nearby beach from garbage hidden in the ground.

Additionally, we wanted to highlight the importance of teamwork, while exploring sustainability in other fields! For that, a cooking session was arranged where all of the participants had also the opportunity to get taste of Mediterranean Cuisine.

Once again, the Erasmus+ Program offered the chance to the European youth to actively participate and take a stand against modern issues like the rapid climate change and its side effects to our planet.

Finally, we would like to thank the Greek National Agency of the program for the unconditional support that is always available to our organization.
